

The background image shows a collection of various metal components, including washers, nuts, and cylindrical parts, all with a bright, reflective electroplated finish. They are arranged on a blue surface with a fine, cross-hatched texture. The lighting creates highlights and shadows, emphasizing the metallic sheen and the different shapes of the parts.

ELECTRO PLATING : INTRODUCTION

Enhances product durability and appearance through a thin, protective metal coating.

Provides corrosion resistance, improved conductivity, and a variety of decorative finishes.

Tin plating offers excellent solderability, low contact resistance, and increased protection against oxidation.

WHY REPS?

“QUALITY, PRECISION, AND A
TIN-TILLATING FINISH”

TRUST US WITH YOUR ELECTROPLATING NEEDS

QUALITY POLICY

“RENUKA ELECTRO PLATINGS operates a policy of continual improvement in pursuit of Quality.

We commit ourselves to comply with Quality Management System and continually improve its effectiveness.

Our aim is committed to Providing Electro Plating on Metal Components meeting customer Specification and satisfaction, maintaining on time delivery and competitive price with an emphasis to derive customer delight.

The fundamentals for achieving our commitment to total customer satisfaction are:

- To provide quality products by "Do Right first time and every time".
- To continually improve our area of operations to maximize efficiently.
- Consistently to meet our customer's expectations on our product quality and performance.
- To build a dedicated, trained and motivated team of personnel's to ensure the effectiveness.
- Shall ensure the effective communication to all relevant interested parties."

QUALITY

RENUKA ELECTRO PLATINGS is dedicated to continuous improvement, focusing on delivering high-quality electroplating services.

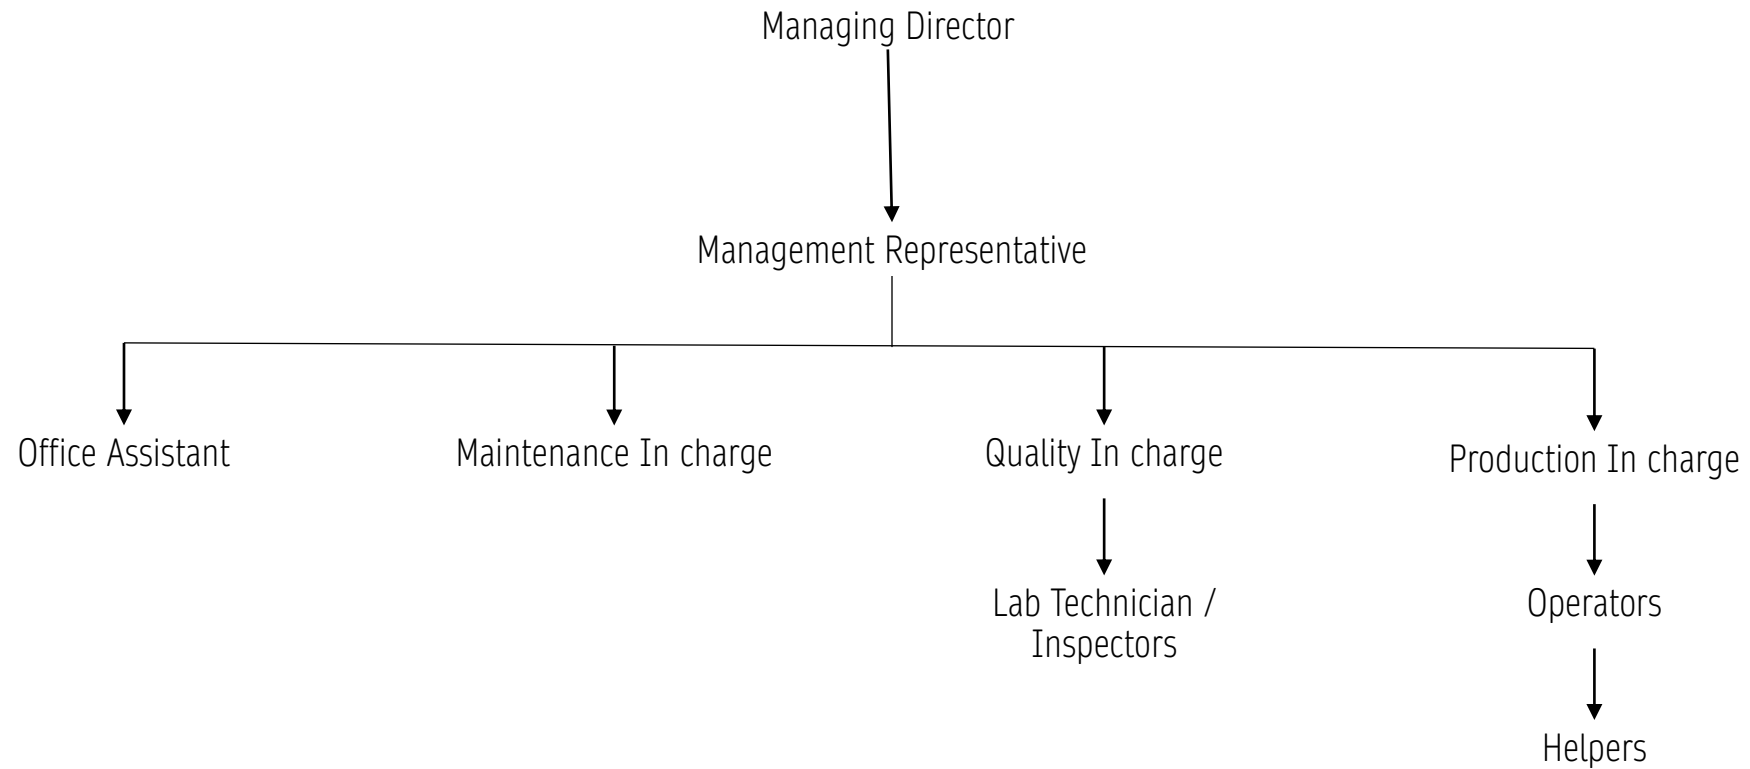

We adhere to a Quality Management System, constantly enhancing its efficiency.

Our commitment is to provide precise electroplating on metal components, meeting customer specifications and ensuring satisfaction.

We prioritize timely delivery and competitive pricing to achieve customer delight.

Our core principles include delivering top-notch products with a "Do Right first time and every time" approach, continuously improving operations, meeting customer expectations, fostering a dedicated and motivated team, and ensuring effective communication with all stakeholders.

AREAS OF FOCUS

ACID TIN

Bright and lustrous appearance.

Nickel or silver plating alternative.

Enhances aesthetics.

High productivity rate.

Offers superior corrosion resistance.

Provides excellent electrical conductivity.

Suitable for intricate and complex geometries.

Provides a smooth and uniform coating.

MATTE TIN

Subtle and matte finish.

Excellent solderability.

Anti-reflective properties.

Provides a durable coating.

Lowers surface reflection for optical applications.

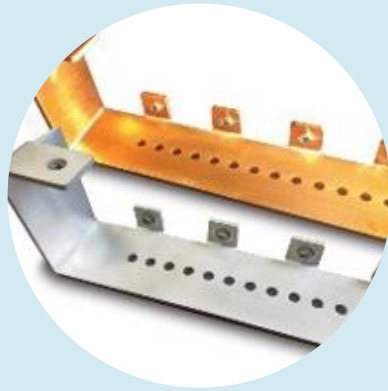

Suitable for applications requiring a non-reflective or non-glare surface.

Resistant to fingerprint smudges and visible surface marks.

Offers a unique and stylish appearance for decorative purposes.

PRODUCTS

REPS

RACK PLATING

Ideal for complex parts.

RACK PLATING

Precise and controlled.

BARREL PLATING

Uniform coating distribution.

BARREL PLATING

High-volume efficiency.

SUMMARY

We specialize in exclusive tin plating in Chennai since 2005, offering both rack and barrel plating. While our limitation is the inability to provide other plating needs, we compensate by ensuring quality and exceeding customer expectations.
